WORK EXPERIENCE

MS Group Company
📅 July 2022 – December 2022   📍 Aveiro,Portugal

I started my career as a Front-end Developer (Full time). MS Group - Máquinas e Tools, Lda. specializes in the distribution and sale of industrial machinery and tools, with a commitment to innovation, quality, and exceptional customer service. During this
experience, I created a user-friendly website from zero for their employee to selling their products in shops. The main technologies that we used here are React.js, JavaScript, Material UI, CSS, SASS, Bootstrap, HTML, CSS, and Figma.

INESCTEC Institute (University of Porto)
📅 2019-2020   📍 Porto, Portugal

This experience is unique to my resume. Awarded research grant for bachelor's degree. I worked as a Researcher at INESCTEC Institute of Research, FEUP, University of Porto, Portugal. Responsible for the development of software modules to be integrated into the Chic platform.
Key Responsibilities:
- Provides feedback to the Agents and receives queries generated by it.
- Using Server-Sent Events (SSEs) or receiving XML HTTP requests (XHRs)
- Increasing work performance from 25% to 50%

Golestan Dezful vegetable oil company Tehran, Iran
📅 2016 - January 2018   📍 Tehran

My duty was Web developer and designer (Full time) . Full support of design and development of the official web page, creation of emails for members, and following applied modifications/requirements for the site, as to keep the site up to date.

Implementation of a website to show the products communicate with customers and advertise for hiring people can help the factory to improve their product.
Key Achievement / Project:
- Increasing overview of the website
- Communicate with customers and people.
- Introduce the factory and the products to people.

SEPHER Co, Tehran
📅 January 2011 - January 2012   📍 Tehran
Outline:
My duty was Supporting the accounting Software.
Key Responsibilities:
- Coding by C and C++ programming languages; solving/supporting bug issues related to the developed programs.
Key Achievement / Project:
- Expand the support unit of Accounting Software with this strategy can improve the next generation of software and know more users what exactly needs to be more comfortable to work with it.
